What Questions Does This Dashboard Answer?

Big Picture / Overview
(Before diving into charts, what should a stakeholder know?)
- How big is Airbnb's presence across major global cities?
- How has Airbnb grown over time and where did it peak?
- Which cities contribute most to Airbnb's overall business?
- Are listings concentrated or evenly spread across cities?

Market Share by City
(Business + strategy questions)
Which cities dominate Airbnb listings globally?
Are a few cities driving most of the supply?
How much of the total market do top cities control?
What is the cumulative contribution of cities like Paris, NYC, and Sydney?
Is Airbnb supply fragmented or highly concentrated?

This answers: "Where should Airbnb focus its growth, regulation, or marketing efforts?"

Property Type & Pricing
(Customer behavior + pricing logic)
Which property types are most commonly listed?
Are hotel rooms more expensive than Airbnb stays?
Why might travelers prefer Airbnb over hotels in certain cities?
Does pricing explain higher adoption in cities like Paris?

This explains why Airbnb wins in certain markets.

Ratings & Customer Satisfaction
(Quality & experience questions)
Which cities deliver the best overall guest experience?
Which cities are underperforming on ratings?
Are low ratings driven by cleanliness, value for money, or communication?
Is high supply always equal to high quality?

This answers: "Where is Airbnb doing well and where is it failing customers?"

What Questions Does This Dashboard Answer?

Review Frequency (Customer Behavior)
(Very important analytical thinking section)
How often do customers actually leave reviews?
Are reviews mostly from repeat customers or one-time users?
What percentage of users write reviews more than once?
Are there extreme outliers (data quality issues or power users)?
Can reviews be trusted as a proxy for engagement?

This shows you understand distribution, skewness, and outliers — not just visuals.

Seasonality Analysis
(Demand trends over time)
Which cities peak during which months?
Is Airbnb demand seasonal or stable throughout the year?
Do European cities behave differently from non-European cities?
When should hosts expect higher or lower demand?
How does travel seasonality vary by geography?

This answers both business planning and host strategy questions.

Trust & Host Verification
(Risk, safety & platform integrity)
How trustworthy are Airbnb hosts overall?
What percentage of hosts are fully verified?
Do most hosts provide at least one trust signal?
How rare are completely unverified and anonymous hosts?
Is Airbnb doing enough to protect customers?

This answers the most critical platform question:
"Can I trust Airbnb hosts?"
